

F24 & F24+ SUPPLEMENTARY AWARD JUDGING CRITERIA

BEST PRESENTED TEAM:

The Best Presented Team will be awarded to the team which have the best overall appearance. This includes uniformity of team wear, teamwork, presentation of the car and refraining from bad language or unsporting behaviour throughout the day.

PORTFOLIO AWARD:

The Portfolio Award has been launched to give Greenpower and our volunteer judges a much better insight into how much work teams have been putting in to their cars on a season by season basis, and how much they have been learning through the project.

The Portfolio is the idea platform to show us the design and build process of a new car. In later years, it can be used to show us how much development work the team have carried out, or if you are racing an older car while a new one is being built show us how the new build is progressing. Don't forget, we want to see the teamwork, the entrepreneurship, artwork, leadership and ANY other aspect of the way your team runs.

Use photographs, copies of letters to sponsors (even if they are not successful), lesson plans, team data, achievements and targets.

Then make sure you produce the portfolio in a way that will be easy to judge. If there is video content keep it brief, if it is on tablet make sure your tablet is charged and available for our judges. If it is on CD, DVD or memory stick, make sure it is in a Microsoft Office package that we can access on the day. We are also happy to see the portfolio in analogue forms – books, folders, noticeboard style presentation. Basically, as long as we can view it at the event, we will welcome it! *Judging for this award will based on the guidelines. (See separate sheet.)*

SIEMENS DIGITAL AWARD

The team who make best use of digital technology. This will include but are not limited to: the use of social media, video creation, virtual wind tunnels to simulate race situations, project planning software and stress analysis software. There will be a higher judging value placed on teams who have utilized Siemens Solid Edge as a CAD programme.

IET ENGINEERING AWARD

The team that demonstrates a strong understanding of engineering. This may include how well a car is designed and made, including the components within the car. For example, using innovative gearing mechanisms within their car. This may also include improving a cars performance via a circuit board or use of software within the cars systems, such as to control how much current the car uses or a heads-up display.

SPIRIT OF GREENPOWER

The team who stand out for positive reasons and have a positive attitude in the face of adversity. Alternatively, maybe a team that has shown us fantastic team spirit by helping another team, lending tools, helping them solve their issues etc. We are looking to award a team that promotes team work and good relationships with fellow competitors.
